Danila Arinov

Junior Python / C++ Developer — backend, REST APIs, automation

+7 901 431-82-98 · teivrim@gmail.com · Telegram @Smishnyavko · github.com/TeivrimOriginal · Portfolio · LinkedIn · Kwork

PROFILE

Python, C++ and Rust. I build backend services, REST APIs and automation; alongside that, graphics and tooling: a raster editor and a game engine from scratch. **1086 automated tests in total, CI on every push: rustfmt, clippy -D warnings, cargo test. Looking for a junior/backend internship, open to test tasks.**

WORK EXPERIENCE

Freelance Developer — client orders on Kwork

`Python · client orders on Kwork`

- Telegram bots in Python, website scrapers, REST APIs and automation built to client specs; kwork.ru/user/teivrim.

Unity indie game — team with a senior developer

`C# · Unity`

- Write code and game design alongside a senior developer; ran hiring for the project. HackIT hackathon: shipped a prototype over one weekend.

PROJECTS

practice-automation-tests — UI autotests

`Python · Selenium, Pytest, Allure · 2026 — Present`

- 47 UI tests on Selenium and Pytest: 28 positive and 13 negative across three pages, plus 6 contact-form tests.
- Allure HTML reports, single-command run, Selenium Manager installs the drivers.

github.com/TeivrimOriginal/practice-automation-tests

Anime DB — catalogue from 3 public APIs

`Actix-Web · SQLite FTS5 · Docker`

- Rewrote the project from Node.js to Actix-Web: aggregation of AniList, Kitsu and Shikimori, ~20k records, JSON API with filters and pagination.
- SQLite FTS5 for full-text search, Docker for packaging, Android client on the same API.
- 564 unit tests; CI on every push: rustfmt, clippy with -D warnings, cargo test.

github.com/TeivrimOriginal/TeivrimSite

TPaint — image editor

`Rust · 2026 — Present`

- Custom immediate-mode UI with no native widgets: 15+ tools, layers with masks and 10 blend modes.
- .tpaint, PSD and PNG formats, 158 unit tests.

github.com/TeivrimOriginal/Copy-SAI-Paint-with-Rust

Teivrim-Engine — engine from scratch

`C++17 · CMake · 2025 — Present`

- Runtime backend selection, scene graph, FBX/OBJ import via Assimp, 88 commits.

github.com/TeivrimOriginal/Teivrim-Engine

Visual novel editor

`C++ · Win32 / GDI+ · MinGW`

- 6 editor panels: Hierarchy, Scene, Inspector, Script, Asset Browser, Timeline.
- Drag-and-drop from Explorer, project save and load.

github.com/TeivrimOriginal/teivrim-novell-engine

TECHNICAL SKILLS

Languages: Python, C++17, Rust, SQL (SQLite), C# (Unity)

Backend: Actix-Web, REST API, JSON, SQLite FTS5, Docker

Automation: Selenium, Pytest, Allure, website scrapers, Telegram bots, third-party API integrations

Developer Tools: Git, CMake, Cargo, MinGW / MSVC, Linux, debugging and profiling

Practices: automated testing (1086 tests across projects), CI, code review, architecture docs

ADDITIONAL

English — reading technical documentation. Open source: 9 public repositories, MIT licensed, every project has tests and CI.
