

Danila Arinov

Junior C++ / Rust Developer — Graphics, Game Engines, Tools, Backend

Fully remote · open to on-site / internship in Zarechny or Yekaterinburg · flexible schedule · open to junior / internship rate · self-employed (self-employed status registered)

+7 901 431-82-98 · teivrim@gmail.com · Telegram @Smishnyavko · github.com/TeivrimOriginal · Portfolio · LinkedIn · Kwork

PROFILE

C++17 and Rust developer with hands-on practice since 2024: graphics and rendering, game engines, editors and tools, backend and APIs. Key projects — **TPaint**, a Rust/OpenGL raster editor (custom UI, 15+ tools, 140+ automated tests) and **Teivrim-Engine**, a from-scratch C++17 engine (Vulkan/OpenGL, scene graph, FBX/OBJ import, 88 commits). Plus a team Unity game (code, game design, hiring) and paid artist work: all visuals for a private DnD project. **Fast at reading unfamiliar code, ship work with tests, open to internships and test tasks.**

WORK EXPERIENCE

Ozon — Warehouse Sorter Nov 2025 – Feb 2026 · 4 mo

- Receiving and sorting goods in the warehouse, zone allocation, WMS scanner work: kept up with pace and did not let a shift fail on high volumes.

Freelance Developer — client orders on Kwork Python · Rust · 2024 – Present

- Service catalogue and order applications: Telegram bots in Python, website scrapers, REST APIs; kwork.ru/user/teivrim.

Artist, private DnD project (paid) Blender · 2D

- All visuals of the project: characters, environments, assets, one consistent style for DMs and players; full sketch-to-asset pipeline.

PROJECTS

TPaint — Raster Editor (SAI / Clip Studio analogue) Rust · OpenGL / GLFW · 2026 – Present

- Raster editor in Rust/OpenGL with a custom immediate-mode UI: 15+ tools, layers with masks and 10 blend modes, .tpaint/PSD/PNG formats, 140+ automated tests.

github.com/TeivrimOriginal/Copy-SAI-Paint-with-Rust

Teivrim-Engine — Game Engine from Scratch C++17 · Vulkan / OpenGL · CMake · 2025 – Present

- From-scratch C++17 engine: runtime Vulkan/OpenGL backend selection, scene graph, FBX/OBJ import via Assimp, SPIR-V shaders; 88 commits.

github.com/TeivrimOriginal/Teivrim-Engine

Anime DB — Catalogue from 3 Public APIs Rust · Actix-Web · SQLite · Docker · 2024 – Present

- Rewrote the project from Node.js in Rust: Actix-Web, SQLite FTS5, Docker, aggregation of AniList/Kitsu/Shikimori (~20k records), JSON API with filters and pagination, Android client.

github.com/TeivrimOriginal/TeivrimSite

Visual Novel Editor C++ · Win32 / GDI+ · MinGW

- 6 editor panels: Hierarchy, Scene, Inspector, Script, Asset Browser, Timeline; drag-and-drop from Explorer, project save/load, tick-based dialogue preview.

github.com/TeivrimOriginal/teivrim-novell-engine

TEAM EXPERIENCE

- Medieval Unity indie game (team with a senior developer) — code, game design, hiring people for the project; preparing it for an investor pitch.
- HackIT hackathon — graphics part and build; shipped a demo prototype over one weekend.

SKILLS

Languages: C++17, Rust, Python, GLSL, SQL (SQLite), C# (Unity)

Graphics: OpenGL, Vulkan, Win32 API, GDI/GDI+, GLFW, GLEW, GLM, Assimp, stb

Backend: Actix-Web, REST API, JSON, SQLite FTS5, Docker

Tools: Git, CMake, Cargo, MinGW / MSVC, Linux, debugging and profiling

Practices: automated testing (140+ tests), code review, SPIR-V, architecture docs, drag-and-drop UI

ADDITIONAL

Russian — native. English — reading technical documentation. Previously — Qt 6 (~2 years, 2–3 projects), now focused on C++/Rust.
